WHY CARE ABOUT MY ORAL HEALTH?

Undertreated dental disease is linked to heart disease, diabetes, Alzheimer's stroke, and cancers.

Patients with advanced periodontal disease have 21% higher medical cost than those with healthy gums.

Expectant females with untreated gum disease are 8 times more likely to give birth prematurely. Premature births result in medical insurance costs of over \$64,000.

Preventative dental exams and oral cancer screenings can diagnose suspicious oral lesions before they become malignant.

Frequently Asked Questions

How does Perfect Plan differ from Dental Insurance?

The Perfect Plan is a discount plan and not a dental insurance. Under this program you are expected to pay dentists directly based on a discounted fee schedule. Unlike traditional dental insurance programs, there are no waiting periods and no annual maximums. Discount programs such as Perfect Plan allow for the unlimited use of services. The fees you pay are based on a discounted fee schedule and are due at the time of service.

How much can I save using the Plan?

The plan covers 1 Exam and 1 set of X-Rays per year. That is a savings of \$200.00 right away.

When can I start using the plan?

Immediately. Your membership is effective immediately upon sign-up. Schedule an appointment right away.

How much does it cost to become a member of Perfect Plan

The cost of Perfect Plan is very affordable and pays itself in just one preventative visit. Perfect Plan is sold on an annual membership basis. Please see the membership cost chart in the middle of this brochure.
